

HP Thin Clients with IGEL OS for financial services

Secure devices built for robust financial workloads

Help keep confidential information safe, efficiently handle data-intensive tasks, and reduce downtime with robust HP Thin Clients and IGEL OS built to the high standards demanded by the financial sector.

Deliver powerhouse performance

Install HP Thin Clients throughout various task-intensive environments while empowering employees to process large amounts of data in real time, ensuring data security, and enjoying a rich graphics experience on up to six 4K displays.¹

Help keep customer information private

Store sensitive regulatory and customer information remotely and help prevent potential leaks with HP Thin Clients and IGEL's Preventative Security Model.[™] IGEL's read-only OS encrypts data and stores no information on the device.

Worry-free IT with minimal updates

When time is money, HP Thin Clients deploy quickly, have fast boot times, and are ready to work as soon as they connect to the network. Empower employees to operate efficiently with devices that require minimal updates and have low failure rates.

Discover the versatility that HP Thin Clients with IGEL OS offer financial institutions across workplaces, workstyles, and workforces

Financial Advisors

HP and IGEL unite to enhance technology solutions for financial advisors, boosting operational efficiency, user experience, and security.

HP and IGEL boost efficiency and security for mobile financial advisors meeting clients online or in person

IGEL OS supports native application of Microsoft Teams, Zoom, and Webex for high quality video conferencing^{2,3,4}

Multi-monitor support provides clear visuals for financial analysis and presentations, and enables multitasking¹

IGEL's secure OS combined with HP's hardware help protect client data and prevent unauthorized access to mobile devices

Call Centers

Enhance call center operations with HP and IGEL, providing enhanced security, streamlined management, and flexible, compliant hybrid work.

Onboard and manage HP Thin Clients with IGEL OS from one central console ensuring performance and consistency

IGEL OS enables secure multi-user access to each HP Thin Client to support shift workers in 24/7 service centers⁵

Thin Clients offer an excellent audio and video call experience with an optional HD camera with temporal noise reduction options^{2,6}

Confidential customer details are protected as IGEL OS is read-only and no data can be downloaded or stored on the device

Financial Trading

Empower your trading strategies with HP and IGEL's collaborative solutions, designed to meet the demands of the financial services sector where performance and reliability are critical.

Efficiently process large amounts of data in real time with powerful HP Thin Clients powered by IGEL OS

Ultimate visibility of data intensive charts, graphics, and news feeds with a rich visual experience on up to six 4K displays¹

Support compliance and regulatory standards with IGEL's Preventative Security Model™ that helps secure trading activity

HP Thin Clients with IGEL OS support leading digital and cloud workspace technologies for quick onboarding, remote management, and secure access to trading apps and platforms

Banking Operations

IGEL and HP's Thin Clients deliver tailored, efficient computing solutions, enhancing security for kiosks, tellers, loan officers and office workers.

HP Thin Clients mounted and powered by IGEL in kiosk mode provide secure, customer friendly service points. Data stays protected and is never stored locally, aligning with financial regulations⁷

Banking staff can connect instantly and securely to the digital workspaces, apps, and platforms for secure customer transactions

With simplified endpoint management and multilayered security, HP Thin Clients with IGEL OS support the banking demands while providing a consistent user experience in the branch, back office, or a self-service kiosk

Learn more about HP Thin Clients and IGEL OS at www.igel.com/hp
