ManageEngine
ADManager Plus

A Unified Active Directory (AD), Exchange, and Microsoft 365 management and reporting solution

Highlights

- One-step user provisioning in AD, Microsoft 365, Exchange, and Google Workspace
- Bulk management of AD objects via CSV files and intelligent templates
- Over 200 prepackaged, actionable reports
- Automation of routine tasks such as AD user creation and clean-up
- Role-, group-, and OU-based help desk delegation
- Integration with popular SIEM, HCM, and help desk tools
- iOS and Android mobile apps

The Active Directory management challenge

Every IT administrator faces the challenge of managing AD objects, Microsoft 365, and Exchange mailboxes for multiple stakeholders on a daily basis. But manually performing complex tasks on multiple platforms is time-consuming, and error-prone.

The solution

ManageEngine ADManager Plus offers the capability to manage AD, Exchange, Microsoft 365, Skype for Business, and Google Workspace accounts from a single console. This web-based solution can help IT administrators manage AD objects, Exchange mailboxes, Microsoft 365 licenses, and more in bulk. It offers a built-in library of over 200 reports to fetch vital information on AD objects. Other capabilities include help desk delegation, customizable workflow, automation, and backup and recovery.

> "
> *We evaluated ScriptLogic Active Administrator, Quest AD management tool and ADManager Plus to solve our day-to-day AD management & reporting needs. ADManager Plus with its high-end features and low-end cost was an obvious choice.* "

Meraz Nasi,
Manager of Infrastructu (ITS),
Interfaith Medical Center,
New York, United States.

ADManager Plus is available in two editions:

- Standard
- Professional

Starts at $595

Licensing model: Domains (with unlimited objects) and number of help desk technicians

One-stop AD Management

- Create users in AD, Exchange, Microsoft 365, Google Workspace, and Skype for Business (Lync) in one step.

- Create or modify AD objects (users, groups, contacts, OUs, and computers) in bulk via CSV import.

- Perform AD and Microsoft 365 management tasks such as resetting passwords, unlocking accounts, and assigning or revoking licenses in bulk with customizable templates.

- Manage shared, remote, room, and equipment mailboxes.

- Migrate user accounts and groups across domains in the same forest using GUI-based actions.

- Manage Group Policy by creating, editing, and linking GPOs effortlessly.

Script-free reporting

- Generate and schedule more than 200 pre-configured, granular reports on AD, Exchange, Microsoft 365, and Google Workspace.

- View inactive users, locked out users, and disabled computers, in just a few clicks.

- Create custom AD reports.

- Export reports in multiple formats including HTML, PDF, XLS, XLSX, CSV, and CSVDE.

- Generate compliance reports to meet regulatory standards such as SOX, GDPR, PCI-DSS, HIPAA, and more.

Non-invasive delegation to help desk technicians

- Granularly delegate AD, Microsoft 365, and Google Workspace tasks to help desk technicians for specific OUs.

- Delegate permissions without elevating technicians' privileges in Active Directory.

- Detect anomalies when the actions of help desk technicians and admins differ from the established norm.

Automation and workflow

- Automate routine Active Directory tasks such as user onboarding and stale account cleanup.

- Exercise control over automated tasks by enforcing workflows within automations.

- Set up multi-level workflows to validate and prioritize user requests with efficient SLA management.

- Limit access to resources for specific time intervals using automation policies.

- Create event-driven orchestration policies that automatically carry out a chain of tasks, like adding or revoking accesses post provisioning and de-provisioning respectively.

Backup and recovery

- Back up and restore AD and Azure AD objects, such as users, computers, contacts, groups, OUs, and GPOs; devices; applications; and more.

- Back up and restore Google Workspace mailboxes, user drives, and calendar items.

- Recover objects completely or granularly without having to restart your DCs.

- Keep track of backup and restore activities with the help of audit reports.

Customizable Dashboard
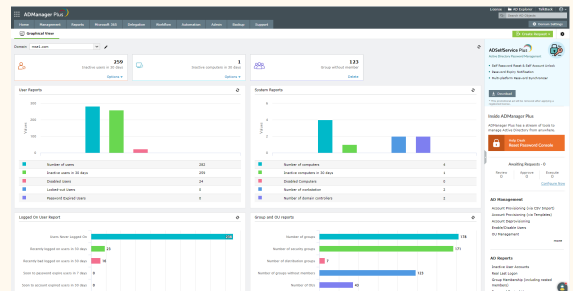

System Requirements

Processor: P4 - 1.6GHz. RAM: 1GB.

Disk space: 4GB.
