

ManageEngine AD360

AD360 is designed for environments, where it takes at least two of the following to solve IAM challenges. Choose what suits your needs and combine them.

Bring Them Together For Optimal Efficiency

AD360 is a unified solution for identity and access management (IAM) needs of organizations running on Windows-based infrastructure. AD360 gives you the power to combine any or all of the four ManageEngine ADSolutions into single-dashboard, single sign on, and single configuration IAM tool.

AD360's offering is very good. It's an interesting mix of solutions that caters to various IAM needs arising in our environment. Both ADMP and SSP have gone a long way to simplify and automate our IAM requirements. Product development seems active, and most importantly, ManageEngine support is responsive and helpful across all the products we use.

ManageEngine ADManager Plus

An Active Directory management & reporting solution, which has more than everything you had wished for in ADUC. From a self-explanatory GUI, manage identities (accounts) in AD or extract instant reports – all at the click of a button! This tool can even turn HR personnel into IT administrators.

FEATURES AND BENEFITS

Standardized, One-Stop Provisioning:

From Exchange mailboxes to O365 accounts, all user entitlements can be provisioned from a single window or provisioning template.

Automated Provisioning/ De-provisioning:

Provisions new user accounts automatically as the roster gets updated. When accounts are terminated, it automatically archives their home folders and revokes their group memberships / access permissions.

Automation of Critical / Everyday AD operations:

Be it "inactive account management" or a routine AD task, it can be automated.

Off-the-shelf User Management solutions:

User management is all about changing any of the 150 user attributes based on a situation. Use the prepackaged solution set to re-provision accounts.

140+ Prepackaged, Reprovisioning-Centric Reports:

Say, you're perusing "Users without logon script" report and decide that you'd assign logon script to certain accounts. Right from the report, choose those accounts and assign the script!

Smart, noninvasive AD Delegation:

Delegate tasks, not the control! With our delegation system and Active Directory Workflow, you can safely delegate user management tasks to business managers / HR, and get them done just the way you want it.

CUSTOMER QUOTES

Reduces the gap between IT and business

We needed an AD product which the HR can use to manage the users. We found ADManager Plus. With this software...you don't have to be computer scientist. Even my boys, 11 and 12, can do it. This product changed my career!

Margaret Sandler

IT Security Specialist, CareTech Solutions

Readymade and on-the-fly solutions

I was looking for something that's intuitive, easy to use, and cost-effective. I did a number of searches. I found ADManager Plus and was impressed. We purchased it. I can now certainly see the benefits from reporting perspective and on-the-fly changes that we can do from the reports

Ashley Bukket

System Analyst, Macmillan Cancer Support

Templates for systematic and policy-centric user management

User management process is really well-thought out. I just have to choose the right template based on the metrics. I don't have to babysit the process anymore. I can hand it off to HR, helpdesk, or even the hiring manager

Aaron Bockelie

Senior Systems Administrator, Warner Bros.

OTHER SALIENT ASPECTS

Automated Office 365 and Google apps provisioning

Exclusive Office 365 reporting

GUI-based NTFS permission management

Ability to automate critical tasks and report generation

Nested group reports and management

Mobile apps : Native Android & iPhone apps to help administrators perform basic AD management tasks right from their mobile phones

ManageEngine ADSelfService Plus

ADSelfService Plus is an IT self-service solution designed for Windows environment. Inarguably the industry's most feature-rich IT self-service solution, ADSelfService Plus can be implemented independently or integrated seamlessly with your websites.

FEATURES AND BENEFITS

Password Self-Service:

Enables end-users to reset their forgotten Windows & Mac passwords (or unlock accounts) without IT helpdesk's intervention. Users can reset passwords from logon prompt (GINA) or via web browser.

Password Synchronizer:

Synchronizes the users' passwords for various cloud/SaaS apps with Windows Active Directory passwords.

Password Expiry Notifier (Freeware):

Emails password expiry notifications to end-users, prompting them to change their passwords before it's too late.

Self-Service Directory Updater:

Helps end-users update their profile info, which keeps the corporate white pages up-to-date and accurate.

People Search:

A search tool for users to search and locate their peers' contact information. (As a bonus, IT administrators can search for a user's AD attributes such as "ObjectGUID", etc.)

Self-Service Group Subscriber:

Enables users to subscribe to their favorite mail groups, provided those groups are distribution lists in AD and administrator has permitted self-service.

CUSTOMER QUOTES

Superfast enrollment for 100% success rate

We have had almost 60% enrollment with ADSelfService immediately, which is a good turn-out when asking students to register for anything. Some have already taken advantage of the tool

Robert Peterson

Technical Support Engineer

Easy & quick user adoption. Quick realization of ROI.

Users have commented how easy enrollment is as well as the reset tasks. CAMH will be able to save close to \$26,000 a year on service desk calls related to Active Directory password resets, and will see a return of investment within the first 6 months of implementation

Margaret Sandler

IT Security Specialist, CareTech Solutions

Right mix of features for complete annihilation of password reset tickets.

Automatic alerts to users about password expiration date and self-unlocking of accounts reduced involvement of IT support by 40%.

Michael Kaźmierczyk

Senior Specialist, Ministry of Environment

OTHER SALIENT ASPECTS

Universal password reset for cloud apps

Alerts upon self-service operations

Mobile-based OTP verification

Clear audit trail for self-service actions

Built-in license management

Password Policy Enforcer

Integrates with ADManager Plus workflow for assisted IT self-service

Integrates with ServiceDesk Plus

Mobile apps : Native Android & iPhone apps to help end-users reset their passwords right from their mobile phones

ManageEngine ADAudit Plus

ADAudit Plus is an IT security and compliance solution designed for Windows-based organizations. It provides in-depth knowledge about changes effected to both the content and configuration of Active Directory and servers. Additionally, it provides thorough access intelligence for desktops and file servers (including NetApp filers), enabling you to protect organization data.

FEATURES AND BENEFITS

Real-time Change Monitoring & Alerting for Active Directory:

A 24x7 surveillance camera for AD! Any change, whether in AD or some member server, is instantly notified with all the 4 Ws recorded: "who" did "what"; from "where" and "when".

User Logon Monitoring:

Get a detailed report of the users' logon and logoff activities, whether they happen via workstations or terminal services.

Audit trail for admin & other privileged user activities:

Track what administrators do. Get details about activities carried out by privileged accounts.

File Access & User Activity Auditing:

(covers Windows file server & NetApp Filers) Know what files/folders the users are accessing. Track every activity they carry out on a file including reading, or deletion, or copying/moving of files.

Anomaly Detection:

Get alerted about unusual events that do not conform to the usual/expected pattern of occurrences, say non-business logon hours or dubiously high invalid logon attempts, before they could magnify into catastrophes.

Contextual Analysis of Events:

Profile-based event trackers, filters, and event fetching rules enable you to view every change and event from a broader perspective, making incident detection easy.

CUSTOMER QUOTES

Identity & Access Intelligence: Prepackaged just the way the industry needs it

No other software works as effectively or easy as ADAudit Plus. None were as simple as but none were as simple to install and jump right in to start using. All audit requirements from HIPAA are covered in ADAudit Plus. We have passed an in-depth PEN audit test and several industry-related security audits because we are using ADAudit Plus. It's extremely simple and cost-effective.

Renee Davis

CIO, Life Management Center, Florida.

Real-time IT Security at Nominal Costs

This tool helps me be in command of the technical environment in my Active Directory network. It is easier to find logs and manage more effectively. The low cost for the many features got our attention.

Diego Pontes

Tecnisa SA

User-friendly and Complete

I highly recommend ADAudit Plus. Now, I can easily monitor user logons, file deletions / modifications, changes in AD and export them as reports. The friendly UI and product support before and after-purchase are excellent.

Huseyin Akbaba

Information Technologies, Rmk Marine

OTHER SALIENT ASPECTS

Report & Alert Profiles: Configure your own event trackers and alerts

Printer Auditing

File Integrity Monitoring

Dedicated Privileged Account Monitoring

Organized Data Archiving

Removable Storage Auditing (Win 8 & above)

"Before and After" Picture for Every Change (for Windows 2008 & above)

Prepackaged IT compliance reports for SOX, HIPAA, PCI, FISMA, and GLBA

Visual Representation of Change Audit Data

Consolidated Audit Trail: User Footstep Tracking in AD & File servers

ManageEngine Exchange Reporter Plus

Exchange Reporter Plus is an analysis and reporting solution for MS Exchange servers. Combining charts and self-explanatory UI, this software offers valuable stats and analytics required by Exchange administrators to keep their organization's email infrastructure at its best. Additionally, it provides an audit trail for crucial events such as mailbox permission or property changes.

FEATURES AND BENEFITS

All-Inclusive Exchange Reporting:

Both the "must know" and "good to know" information is available for every component of an Exchange infrastructure including mailboxes, OWA, distribution lists, public folder (and its contents), etc.

Mailbox Reports:

Offer a 360-degree view of all the mailboxes in the organization. From mailbox size to permissions, every detail is reported. Additionally, you get to spot inactive or orphaned mailboxes, enabling you to get rid of them and secure the infrastructure.

Email Traffic Reports & Security:

Email traffic through the mailboxes, distribution lists and public folders are analyzed and reported. Finer attention has been paid to mailbox traffic, so that you get a complete picture of how mailboxes communicate with each other or with external Internet domains.

OWA / ActiveSync Reports:

You can keep a watchful eye on OWA users through these reports. Get a detailed summary of ActiveSync-enabled devices and ActiveSync policies governing them. Supervise the ActiveSync requests.

Exchange Server Auditing & Alerting:

Critical events such as changes to mailbox permissions or properties get reported. Alerts can be configured to detect alarming events such as a store dismount, or dubiously high non-owner mailbox logon, or someone tampering with "Send As" permissions.

CUSTOMER QUOTES

Self-Explanatory Reports To Help Exchange Management

We needed granular reporting on Exchange so we can have a better understanding of the environment itself, and so that we can begin to charge various projects for this core service use. Exchange Reporter Plus gave all this – without having to depend on powershell scripting.

Shannon Rubin
IBTS (Institute for Building Technology and Safety)

Easy Mailbox Size Planning

It was difficult to find out Exchange mailbox sizes and carry out capacity planning. Exchange Reporter Plus reports helped us, and we were able to decrease mailbox sizes and not add to disk. And this tool was well within our budget.

Renee Davis
CIO, Life Management Center, Florida

Reports, Stats, & Analytics in a User-Friendly UI

As a system administrator for an enterprise, I can say that Exchange Reporter Plus is a great and easy tool to track your Exchange environment, using a friendly web-based analysis UI. With this tool, it's easy to get mail traffic stats, mailbox sizes and properties. Very useful.

Tzachi Elkabatz

OTHER SALIENT ASPECTS

Mailbox & Public Folder content tracking

Mailbox retention policy reporting

Detailed storage reports for mailbox/
public/server stores

Custom recipients traffic monitoring

Exclusive inactive distribution list reports

Elaborate mailbox property reports

Customizable views for better insight

support@exchangereporterplus.com

ManageEngine EventLog Analyzer

EventLog Analyzer is a log management and analysis tool, which detects threats to network quickly and easily. Designed to collect and process massive amounts of log data practically from any unencrypted log, this SIEM solution can easily scale out your IT deployments and protect them from any kind of threat – regardless of whether they emanate from inside the network or outside of it.

FEATURES AND BENEFITS

Universal Log Parsing and Indexing:

A unique proprietary technology allows the tool to collect, analyze, report on and archive logs from practically any machine as long as the logs are in an unencrypted, human-readable form.

Threat Detection by Correlation:

A correlation framework driven by correlation rules – both built-in and user-provided – adeptly sifts through the aggregated log data for suspicious activities, connects the dots and uncovers even those threats that usually go undetected.

Vulnerability Assessment and Threat Analysis:

In addition to built-in reports, the tool also imports and analyzes logs from vulnerability scanners, end-point protection and DLP software to identify network vulnerabilities, so that you can prioritize the risks and mitigate threats.

Real-time Alerts and Follow-up Actions:

The solution enables you to configure real-time alerts for critical events or contingencies. Not just real-time alerts via email or SMS, the tool can also trigger follow-up actions such as activating a program when a stated event occurs.

Powerful and Swift Log Search:

Searching terabytes of log data to locate a security event is effortless. From wildcards to advanced search, the tool equips you with powerful log searching capabilities to zero in on the security event.

CUSTOMER QUOTES

Crystal Clear Analytics & Real-time Alerts for Swift Threat Detection

An order of magnitude reduction in the time necessary to reviewing and analyzing logs. Additionally, ELA provides real-time alerting of significant events. This facilitates rapid analysis and reaction to events. Instead of days before identifying a significant event, the event is known in near real time and can be responded to before it becomes an issue

Michael Thorp

Principal Information Security Analyst, AAI Corp, Textron, Inc.

Best-in-class Intrusion Detection, Economical Pricing

Windows event logs and device Syslogs are a real-time synopsis of what's happening on a computer network. EventLog Analyzer is an economical, functional and easy-to-utilize tool that allows me to know what's going on in the network. It's a premium intrusion detection system.

Jim Lloyd

Information Systems Manager, First Mountain Bank

A Scalable Tool Trusted for IT Compliance Demonstration

Credit Union of Denver has been using EventLog Analyzer for more than 4 years. Provides great value as a network forensic tool and for regulatory due diligence. This product can be rapidly scaled to meet our dynamic business needs.

Benjamin Shumaker

Vice President of IT/ ISO, Credit Union of Denver

OTHER SALIENT ASPECTS

Agent-based or agentless log gathering

Collects logs from Windows, VMWare, Cisco, Symantec...you name it

Exclusive IT compliance reports

1000s of built-in reports

Built-in threat identifiers

Network device monitoring

File integrity monitoring

Removable disk auditing

Custom reports and alerts

support@eventloganalyzer.com

ManageEngine RecoveryManager Plus

RecoveryManager Plus is an Active Directory backup and recovery solution which streamlines AD change management. It's engineered to take away all the pain and effort involved in one of the most dreaded IT tasks: Active Directory backup and recovery. With its neat UI and design, the tool enables you to effortlessly restore AD objects to a preferred state or specific point in time.

FEATURES AND BENEFITS

Self-Explanatory UI and Simple Recovery Process:

From a friendly UI accessible via a web browser, recover deleted Active Directory objects or undo inadvertent changes to objects without much ado.

Automated, Schedulable Active Directory Backups:

The tool automatically backs up Active Directory objects as per the backup schedule configured by you.

Uptime-Friendly Active Directory Recovery:

There is no need to stop or restart Active Directory while recovering deleted objects or undoing object changes.

Versions for Easy Point-in-Time Restoration:

Changes to objects happening at a point in time are grouped and earmarked, making it easier for you to roll back an object to a desired state.

Comparative Review of Changes:

Alongside the current value of an object attribute, the tool lists down a neat record of all the values the attribute had previously held. This enables you to comparatively analyze the changes and decide what is best to restore.

Complete or Granular Recovery:

You can either restore a whole Active Directory object or selectively restore a few of its attributes.

support@recoverymanagerplus.com

ManageEngine FileAudit Plus

FileAudit Plus is an exclusive change reporting and alerting tool for Windows file servers. It reports on any change made to files, folders, and shares – in REAL TIME. Additionally, it can instantly alert about file changes and modification attempts, both successful and unsuccessful.

FEATURES AND BENEFITS

Complete Insight into Every Change

Offers you full details about who made a change, what the change was, and when it was made.

Reports on File Permission Changes

The tool exclusively reports about changes to file permissions and owners.

Configurable Real-time Alerts

Configure the tool to alert you on critical events such as failed attempt to read/ write files, file creation/ deletion, file permission changes, and more.

Data Visualization & Self-Explanatory Reports

Offers file audit data in a simplified format supplemented with graphs and charts, which makes it easy for even non-IT staff to spot anomalies and report them.

Light, Unintrusive Agents

The tool employs lightweight agents on file servers, which, without intruding with the system, collects the file audit data.

Makes Compliance Demonstration a Cakewalk

Whether PCI DSS or HIPAA, data integrity and protection is the cornerstone, which can only be accomplished with a file auditing system. FileAudit Plus's built-in reports and real-time alerts provides enough data to demonstrate any IT compliance in Windows environments.

www.fileauditplus.com

support@fileauditplus.com

ManageEngine SharePoint Manager Plus

This SharePoint reporting and auditing tool puts you in control of your SharePoint implementation. Besides offering complete visibility of SharePoint infrastructure, it presents all the data it takes to manage it. Additionally, the tool tracks and alerts about changes to SharePoint server configurations and security settings.

FEATURES AND BENEFITS

Enterprise-wide Visibility

From server farms to documents, every aspect of SharePoint infrastructure is identified and reported, no matter how wide the enterprise is. Nothing is missed irrespective of whether yours is an on-premise, hybrid, or cloud implementation.

Exclusive Reporting for SharePoint Online

Predefined, out-of-the-box reports for your SharePoint Online. Sample: *Document Libraries with more than 1000 items/ Explicit Permissions/ Unmodified for 2 months.*

Permission Tracking

The tool scans the entire farm(s) and reports in detail the different permissions a user holds on the different sites in the farm. (Directly assigned permissions are identified too.)

Tracking Changes to SharePoint Content

Changes to all SharePoint content – including changes to audit settings themselves, documents checked in/out along with timings – are captured and documented.

Security Configuration Change Auditing

From changes to groups to unique permissions set, every change critical to SharePoint access and security is audited.

Prompt Alerts for Better Security

The tool can be configured to alert any change (whether to content or security settings) in the SharePoint ecosystem.
