

Ivanti Neurons for UEM

Discover, manage, secure and heal all your devices - no matter where they are.

In today's hybrid and remote Everywhere Workplace, your IT team must manage and secure ever-growing endpoints against phishing attacks and cyberthreats.

To focus on more strategic initiatives – such as improving your digital employee experience for all end users – your team needs a single tool to analyze, perform and automate endpoint management and security tasks now more than ever.

With Ivanti Neurons for UEM, your IT team can leverage a single pane of glass view into their devices to efficiently discover, manage and secure all endpoints through accurate and actionable insights which enable faster remediation.

Ivanti Neurons for UEM provides real-time intelligence into the health, security and performance of all your devices to detect and remediate any device issues and security threats before they can cause harm in your environment.

Arm your IT teams with the contextual insights and intelligent automation they need to proactively detect and resolve endpoint issues and provide better digital employee experiences – ultimately driving better business outcomes – with Ivanti Neurons for UEM.

Key message

- Ivanti Neurons for UEM is a cloud-native solution that provides a complete view of all devices in your IT estate to discover, manage and secure all types of devices.
- Ivanti Neurons for UEM's robust endpoint management and security capabilities ensure that only compliant and authorized devices connect to business resources.
- Ivanti Neurons for UEM improves IT efficiency and optimizes resources by automating routine tasks and offering actionable and contextual insights.
- Ivanti Neurons for UEM delivers highly secure, contextualized, personalized and productive digital employee experiences without overburdening your IT team.

IT challenges in the Everywhere Workplace

- Using multiple tools to manage and secure all types of devices.
- Not having complete visibility on device compliance issues.
- Difficulty rolling out apps and standardizing processes across the organization.
- Supporting BYOD initiatives to protect corporate data and user privacy at the same time.
- Providing great onboarding experiences for remote workers.

Solution

- Ivanti Neurons for UEM

Key benefits

- Have complete visibility into IT assets by discovering all devices on your network.
- Manage all types of devices across the entire lifecycle from onboarding to retirement.
- Improve security posture by securing all your endpoints and environment.
- Deliver exceptional digital employee experience and improve employee productivity.
- Increase IT efficiency and productivity via AI-powered automation.
- Optimize IT spending and resources to focus on strategic initiatives.

Key capabilities

Leverage a single source of truth to discover and inventory all your endpoints

- Instantly detect new and unknown devices on your network via active and passive scanning and third-party connectors.
- Enjoy out-of-the-box normalization and reconciliation engine.
- Automatically deliver accurate IT asset data in minutes instead of days.

Efficiently manage and secure all your devices across the entire lifecycle

- Manage all your endpoints – including iOS, iPadOS, macOS, Android, Windows, Zebra, Oculus devices and wearables – and support both modern and client management.
- Secure access to data and apps on any device across your Everywhere Workplace.
- Automate endpoint lifecycle management – from onboarding and provisioning, to configuration and retirement.

Deliver AI-powered self-healing and self-service capabilities

- Provide a 360-degree view of devices, users, applications and services, with real-time, contextualized insights.
- Automate workflow management and enable both standard and custom actions.
- Proactively diagnose and quickly remediate issues on all endpoints.

Optimize endpoint performance and maintenance costs

- Query all edge devices using [natural language processing](#) (NLP).
- Deliver real-time IT intelligence across the enterprise in seconds or minutes, not days.

Robust application management and deployment

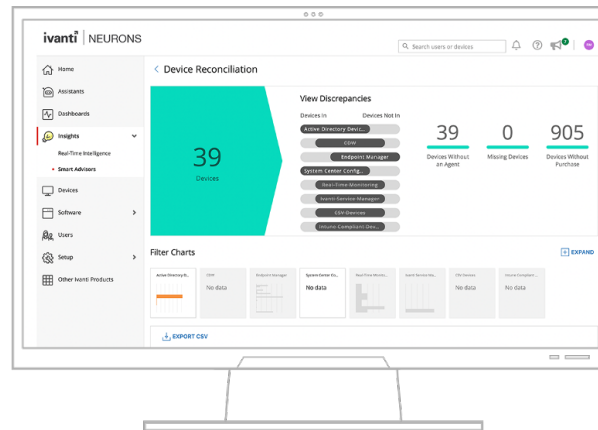

- Deploy applications and manage updates with a single, intuitive tool.
- Interact with users, provide feedback and collect information in one place.
- Provide comprehensive software overviews* – including software inventory status, reports on end-of-life license, upgrades and risks associated with apps, etc.

Foundation for mobile device security via integrated mobile threat defense** (MTD)

- Protect against all known and unknown threats on Android and iOS devices across all mobile attack vectors – including device-level, network-level, application-level and phishing attacks.
- Remediate threats via on-device detection, even if the device is not connected to a Wi-Fi or cellular network.
- Automatically remediates threats based on access policies.

Differentiation – Why Ivanti Neurons for UEM

- **Continual, automated discovery for all devices** – Ivanti Neurons for UEM provides a gap analysis of management and security coverage without manual effort.
- **AI-powered self-healing and self-service for endpoints** – Ivanti Neurons for UEM provides IT with real-time intelligence and contextualized insights that help reduce routine tasks and time on troubleshooting.
- **Complete UEM solution with agent-based and modern management** – Ivanti Neurons for UEM supports all devices, use cases and deployment scenarios across all OS platforms.

- **Support breadth of use cases** – Ivanti Neurons for UEM manages and protects any employee device, from knowledge workers to frontline workers.
- **Secure application connectivity** – Ivanti Neurons for UEM secures connectivity and access control for cloud and on-premises applications.
- **Mobile threat defense (MTD), Patch Management, Risk-based Vulnerability Management (RBVM) and Application Control** – easily integrate other security solutions*** with Ivanti Neurons for UEM to provide IT teams with actionable insights and reduced overhead, enabling greater levels of compliance with security mandates.
- **Improve the digital employee experience** – Ivanti Neurons for UEM aggregates device details and scores end user experience with devices to improve both IT and end user experience and productivity.

*Software asset management features are available with the purchase of Ivanti Neurons for Spend Intelligence add-on SKU

**MTD: Add-on SKU

***Ivanti security solutions such as: MTD, Patch management and/or RBVM can be integrated with the purchase of an add-on SKU

About Ivanti

Ivanti makes the Everywhere Workplace possible. In the Everywhere Workplace, employees use myriad devices to access IT networks, applications and data to stay productive as they work from anywhere. The Ivanti automation platform connects the company's industry-leading unified endpoint management, zero trust security and enterprise service management solutions, providing a single pane of glass for enterprises to self-heal and self-secure devices, and self-service end users. More than 40,000 customers, including 78 of the Fortune 100, have chosen Ivanti to discover, manage, secure and service their IT assets from cloud to edge, and deliver excellent end user experiences for employees, wherever and however they work.
