Datasheet

Exchange backup and restoration

On-premises Exchange | Exchange Online

- Back up all items in your Exchange environment.*

- Perform incremental backups of all items.

- Schedule backups to happen at fixed intervals.

- Define a retention period for your Exchange backups.

- Restore entire mailboxes or individual items in a mailbox to any backed-up state.

- Restore backups to the same mailbox or a different one.

* Emails, calendar entries, contacts, journals, notes, posts, and tasks.

Highlights

On-premises Exchange backup
Back up all mailbox items in your on-premises Exchange organization, including emails, calendar entries, contacts, journals, notes, posts, and tasks.

Exchange Online backup
Back up your entire Exchange Online tenant, including all emails, calendar entries, contacts, journals, notes, posts, and tasks.

Backup storage in Azure:
Store your Exchange(on-premises and online) backups in Azure Blob Storage and Azure file shares.

Item-level restoration
Restore individual items such as a single email or calendar event to any backed-up state.

Cross-user restoration
Restore backed-up mailbox items to the same mailbox, to a different mailbox, or even to a mailbox in a different tenant/organization.

Cross-platform restoration
Restore a backup of an on-premises mailbox to a mailbox in your Exchange Online tenant and vice-versa.

Restore preview
Preview backed-up items to make sure that the right value is restored.

Incremental backups
Speed up the backup process by backing up only the changes since the last backup cycle.

Retention policy
Define a custom retention policy to specify how long backups will be held in your repository.

Scheduled backups
Schedule your backups to happen at non-business hours to ensure there's minimal changes on the mailboxes when they're being backed up.

Compression
Compress backups of Exchange items to save storage space

System requirements

Environment:
On-premises Exchange: Microsoft Exchange Server 2010 SP1, 2010 SP2, 2010 SP3, 2013, 2016.
Exchange Online.

Processor:
2.13GHz or higher
RAM: 8GB

Disk space:
This requirement varies based on the number of backed-up mailboxes and the configured retention period.

If the total size of the mailboxes to be backed up is 10GB, make sure that you have 10GB of free disk space to store the full backup and all subsequent incremental backups forever.

Supported browsers:
Internet Explorer 8 and above
Mozilla Firefox
Google Chrome
